OnePager Pro and OnePager Express Attain Windows 7 Certification

Chronicle Graphics' Software Products Pass Microsoft's Platform Ready Tests

CENTENNIAL, COLO – May 13, 2011 - Chronicle Graphics, publisher of the OnePager suite of project schedule presentation software, announced today that it has successfully completed Microsoft's Windows Compatibility Testing program and achieved the status of Microsoft Platform Ready for Windows 7.

OnePager Pro, which is a Microsoft Project addin, and OnePager Express, an Excel addin, were tested using Microsoft's Windows 7 Software Logo Toolkit and were determined by Microsoft to have both passed.

Both OnePager Pro and OnePager Express V4.0 make it easier for project managers and analysts to create timeline views and Gantt charts from source information already prepared – no new data entry is required. OnePager outputs provide task positioning and layout, a richer use of color, and the ability to add notes and comments to facilitate schedule conversations with senior executive, project team, and customers.

“Passing these rigorous tests with our Version 4.0 is an important milestone,” said Bob Feingold, Vice President for Product Management at Chronicle Graphics. “We assure all our customers that OnePager will operate on any Windows platform, work effectively with other addin software they may have, and perform consistently within their networks. We are quite pleased to meet these Microsoft requirements.”

About Chronicle Graphics

Chronicle Graphics is the company behind OnePager Pro and OnePager Express, project presentation tools that create rich visual summaries and overviews for use with scheduling teams, senior management, and other key stakeholders. Founded in 2005, Chronicle Graphics has licensed its technology to Fortune 500 companies spanning multiple industries, in addition to numerous government agencies, and is a Microsoft Certified Partner. More information on the Chronicle Graphics suite of products is available at <http://www.chroniclegraphics.com>.
