

Communicate project status.

Create full-color Gantt charts quickly and easily using data from Microsoft Office Excel.

Product Overview

OnePager® Express works with Microsoft Office Excel to create full-color Gantt charts, complete with milestones and progress bars. OnePager Express is ideal for simpler schedules that do not require the advanced features of Microsoft Office Project, or for creating timeline views using data from other project management tools like Primavera or PlanView.

How it Works

- Build a schedule or task list in Microsoft Excel
- Launch OnePager Express to create a snapshot
- Customize colors, fonts, and layouts
- Share in Microsoft PowerPoint, web, or e-mail

Features

- Import from Microsoft Excel
- Export to multiple formats
- Customize timeline appearance
- Show dependencies between tasks
- Attach comments to tasks
- Show percentage complete of a task
- Illustrate project baselines
- Make weekly updates
